

daintree healing/hydrating facial moisturiser

item no.: 1099

what it is

An intense moisturising crème that leaves your skin looking and feeling revitalised. It is particularly suited to dryer or easily dehydrated skin.

what it does

- This moisturiser contains higher than normal levels of combined essential oils derived solely from plants. These essential oils are highly complex compounds, which are almost impossible to recreate synthetically and carry a host of benefits – they may calm inflammation, fight infection, balance moisture levels and smell wonderful, all at the same time.
- Helps restore the skin's healthy balance by adding core nutrients.
- Provides intense moisture to revitalise even the driest and most dehydrated skin.
- Provides an excellent base on which to apply make-up.

main active ingredients

Tropical Sugar Cane – has excellent exfoliating and re-moisturising properties, and is rich in minerals and vitamins (C and E) that help feed and protect the skin's delicate mantle. It acts to hold moisture against the skin, which means it is effective for longer.

Witch Hazel – is a natural, vegetable-derived astringent and skin purifier.

how to use

Smooth over cleaned skin and allow to absorb fully. Reapply to sensitive, dry areas.

when to use

Use a little morning and night. May also be used as a weekly revitalising moisture treatment by applying a thin layer over the face and neck for 10 minutes before rinsing with cool water.

companion products

For best results, also use Daintree Foaming Softening Cleanser and Daintree Tonic Express.

results

- Thoroughly moisturises and revitalises skin
- Helps smooth out fine lines and imperfections
 - Leaves skin looking healthy and supple
- Promotes faster recovery for temporary skin imperfections
