

daintree rich moisturising AHA crème

item no.: 1068

what it is

A deep moisturising crème also formulated to perform a very light skin peel.

what it does

- AHA (Alpha Hydroxy Acid) uses its inherent skin purification properties to gently dissolve dead and ineffective skin cells. It helps to improve oily skin, prevent acne, treat fine lines, reduce wrinkles and lighten freckles. It will also improve your skin's overall texture and leave it looking beautifully radiant. The crème's pH level of 3.8 maximises the effectiveness of AHA.
- AHA crème will make your skin feel fresher, hold make-up for longer and exhibit a more radiant natural colour and complexion.

main active ingredients

Wild Mate' – contains healing, regenerative and antioxidant properties
Witch Hazel – a natural, vegetable-derived astringent and skin purifier.

how to use

Apply to cleansed skin, allowing enough time for natural absorption to occur, particularly before make-up application.

when to use

Apply morning and night.

companion products

For best results, alternate with Daintree Tropical Sugar Cane Healing Hydrating Moisturiser. For very tired or listless skin use Daintree AHA Crème alone morning and night everyday for 30 days before alternating with another moisturiser.

For maximum benefit, also use Daintree Antioxidant Facial Exfoliator and Daintree Miracle Mask.

results

- Your skin will feel fresher and cleaner
- Your skin will be better able to hold make-up
- Promotes a more radiant natural colour and complexion
- Helps to reduce blemishes, fine lines and wrinkles
